About the Census:

- The Census is a count of everyone in the U.S. every 10 years.
- Census data are used to establish the number of Congressional seats to states and distribute federal funds.
- It is estimated that for each person counted in the census, the federal government sends more than \$12,000 to the local area over a 10-year period.
- It takes less than 10 minutes to complete and is CONFIDENTIAL by law.
